

Assistant Professor in Pharmaceutics

The Department of Biomedical & Pharmaceutical Sciences at the University of Rhode Island in Kingston, Rhode Island has an opening for a tenure-track, academic year position beginning July 1, 2010.

BASIC FUNCTION: The successful candidate will be expected to establish a nationally recognized research program in pharmaceutics, conduct collaborative research with faculty in the URI College of Engineering, and teach courses in pharmaceutics, physical pharmacy, formulation lab and GMP manufacturing.

QUALIFICATIONS:

REQUIRED: The department is specifically looking for candidates with qualifications consistent with the goals of the University and the strategic plans of the Colleges of Pharmacy and Engineering. Accordingly, the following are required:

- 1) A Ph.D. in Pharmaceutics or a closely related field;
- 2) A proven track record of journal publications and technical presentations in Pharmaceutics and the ability to develop an independent research program;
- 3) Strong interpersonal skills

PREFERRED: A professional degree in Pharmacy;

- 1) Candidates having teaching experience in these areas preferred: pharmaceutics, physical pharmacy, formulation lab and GMP manufacturing;
- 2) Industrial experience in the pharmaceutical industry with experience in drug manufacturing, product formulation, drug delivery or dosage form design.

Visit <https://jobs.uri.edu> for details about the position and instructions for online applications. Reviews will continue until the position is filled.

Please submit a cover letter, CV with names of references included (reference letters upon request), and a three page statement of research interests.
